### **inFRONT receives Lenel certification**

#### **A new member of the OnGuard OpenAccess Alliance Program**

NEW ORLEANS, LA January 15, 2007 – inFRONT is proud to announce that it has received Lenel certification for TimeSentry, a Time and Attendance application that interfaces to the OnGuard security platform by Lenel. Effective immediately, inFRONT is a member of the OnGuard OpenAccess Alliance Program. TimeSentry will be available to OnGuard users exclusively through Lenel certified resellers with support from inFRONT's Technical Services division.

TimeSentry will provide Lenel OnGuard users the ability to add Time & Attendance, Contractor Invoicing and advanced time & labor reporting using their existing access control logs. According to the American Payroll Association, employers can save up to 12% of payroll costs by leveraging their existing infrastructure and applying their company-specific pay rules.

“TimeSentry should be strongly considered by OnGuard users who have over 100 wage-roll employees,” stated Chris Laibe, Chief Executive Officer of inFRONT. “The clock-in / clock-out data is readily available through OnGuard, and our TimeSentry software enables users to embody their pay rules and more accurately pay their employees. By using precise data, they will reduce payroll expenses by eliminating errors and “buddy punching”. In 30 years of processing payroll data, our clients have never missed a payroll period . We are excited to be able to offer these benefits to the Lenel customer base.”

“inFRONT has completed required factory testing at Lenel to validate the functionality of its interface to OnGuard. We look forward to their continued involvement in the OnGuard OpenAccess Alliance Program,” said Joshua E. Phillips, Director of Strategic Alliances for Lenel.

“The addition of the TimeSentry product to the OpenAccess Alliance Program should offer a real opportunity to the Lenel certified reseller community,” stated Chris Ryan, Channel Program Manager for inFRONT. “Because these systems have clear, tangible paybacks in hard dollars measured in weeks or months, customers are excited to add these features to their implementations. The implementation of TimeSentry is quick, easy and seamless without impacting the existing Access Control system.”

About inFRONT:

inFRONT is a pioneer in Time & Attendance processing for medium and large enterprises. For 30 years, inFRONT has been meeting the needs of their customers by developing reliable, mission critical software to meet your time & attendance needs.
